

## **PHAR-QA: Quality assurance in pharmacy education and training in Europe**

### **AIMS:**

- 1) Establishment of European network in QA for PET.  
*This will provide a source of information on QA in any given HEI and / or country.*
- 2) Survey existing QA systems used and produce report.
- 3) Develop a model for QA for PET based on (2) and modified Delphi/TUNING interaction with partners.  
*This will allow harmonization of the multitude of very diverse QA frameworks.*
- 4) Test the model and readjust as required.
- 5) Propose a finalized model for application of QA in Europe and elsewhere.  
*This will provide a basic harmonized model for QA for PET in Europe.*
- 6) Disseminate and exploit the final model through EAFP and other channels so as  
*to create the European QA in PET networking system and agency.*

### *Take home message:*

***PHAR-QA will impact on all European HEI staff and students  
but the final stake-holder will be the European patient  
who will benefit from a better pharmaceutical service using better medication.***
